

A Beginner's Guide to Over Under Betting on Crown88

Description

»

Crown88 is an online casino brand that attracts Australian players with a mix of sportsbook-style markets and traditional casino games. One popular market that often appears on Crown88 is over/under betting – a straightforward wager where you predict whether a given statistic (like total points – goals or card totals) will be above or below a set number. This guide will walk you through how over/under betting works on Crown88 – tips for beginners – and key considerations specific to Australian players.

How Over/Under Betting Works on Crown88

Over/under betting removes the need to pick a winner and instead focuses on totals. Crown88 lists a line – for example – total football goals set at 2.5 – and you choose:

- Over if you think the combined goals will be more than 2.5.
- Under if you think the combined goals will be less than 2.5.

The same principle applies to many markets on Crown88: total points in basketball – total runs in cricket – or even totals in casino games like baccarat or roulette-like markets when offered.
