DevOps je proces, který umožňuje rychlejší vydávání nových verzí softwaru a zároveň snižuje riziko chyb. Klíčové prvky DevOps zahrnují automatizaci, spolupráci mezi vývojáři a operačními inženýry, a kontinuální integraci a kontinuální deploy. Tímto způsobem lze zlepšit kvalitu softwaru a snížit dobu potřebnou pro uvedení nových funkcí na trh.

DevOps je proces, který umožňuje rychlejší vydávání nových verzí softwaru a zároveň snižuje riziko chyb. DevOps - The Best of Both Worlds

DevOps is a set of practices that combines software development (Dev) and IT operations (Ops) to shorten the systems development life cycle and deliver high quality software more frequently. It is a cultural shift that emphasizes collaboration, communication, and automation. DevOps is not a specific tool or technology, but a mindset and a set of practices that can be applied to any organization.
